

HiOPC Expert 3.0

Description: Software licence for HIOPC network management and analysis software suite to integrate SNMP data into OPC applications. Extended functional range in comparison with HIOPC Basic, e.g. ICMP support (\ping\)

Type: HiOPC Expert 3.0 Licence

Version: full version

Configuration:

Configuration functions - integrating SNMP data into OPC applications

- pre-built tag databases for Hirschmann devices
- auto-discovery
- user defined tags

Diagnostics:

Supervision and Control - monitoring and operation without any knowledge of SNMP

- monitoring of all status such as e.g. network status, link, power supply, fan ...
- ICMP (\ping\) support
- SNMP trap support
- dataviewer and communicator
- network analyst
- MIB template generator

Modules and supported components:

Modules and components every SNMP device

Software requirements:

Operating system Windows NT 4.0 SP5, Windows 2000

Minimum requirement for Hirschmann agents SNMP

Supported SCADA systems any OPC-client application,

Wonderware inTouch,

Cimplicity HMI,

Intellution iFix,

Siemens WinCC,

Iconics,

Allen Bradley RSVIEW

Supported SCADA systems data access specification version

Hardware requirements:

Processor Pentium 100 MHz minimum

RAM 64 MB RAM

Hard disk space 10 MB free

Network IEEE 802.3 compliant Ethernet networks with SNMP manageable devices

Scope of delivery and accessories:

Scope of delivery to download from Internet (7MB zip),

online help,

evaluation version with complete functionality for one IP adress
